DETAILED ACTION

Drawings

New corrected drawings are required in this application because The shaded pictures depicted in figure 1 are not clear and will be further degraded during copying. Also, the numbers and some of the lettering is not a standard size. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are not required in reply to the Office, because the requirement for corrected drawings will be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hall et al. (6,026,375), and further in view of Kuykendall.

In regards to claims 1-31, Hall teaches all the claimed features related to a mobile ordering system that schedules an order over the Internet and allows payment of same for pickup at a prescribed time, but does not specifically mention the features related to the use of a wireless tag. Kuykendall teaches a system that allows a McDonalds customer to pay using California's Fastrak toll- payment transponders. It would be obvious to a person of ordinary skill in the art to include the wireless tags as a

payment/arrival indicator as taught by Kuykendall, because this would increase the speed of delivery at the point of pickup.
